Policy Updates

Commission consulting stakeholders on Heat Strategy

Wednesday September 9th marked another important milestone along the way to the anticipated publication of a European Heating and Cooling Strategy by the European Commission. As a follow-up to the [Heating Conference](#) in February and the more recent event during [Sustainable Energy Week](#), the Commission held a stakeholder consultation designed to gather comments on a series of '[issue papers](#)' circulated by the Commission during the summer.

While the relatively unstructured nature of the discussion and the wide range of opinions expressed made it difficult to take away a single, unified conclusion, what is clear is that District Energy is no longer a nice subject in the Brussels energy debate. Our sector was certainly among the day's most frequently discussed topics. [Read more.](#)

For more information contact Eloi Piel at ep@euroheat.org.

[Top](#)

Circular Economy and Waste-to-Energy

Over the summer months the Commission carried out two consultations related to waste management: on Circular Economy and the functioning of waste markets. Since Waste-to-Energy accounts for 10% of district heating supply in the EU, [Euroheat & Power provided input to the consultation on the functioning of waste markets and a contribution to the Circular Economy debate](#) on the basis of the input received from members. The Circular Economy package setting new recycling and landfilling targets for 2030 is expected in December. The Commission's report on waste markets distortion might be presented as part of the package but is unlikely to influence the legislative proposal directly.

For more information contact Krzysztof Laskowski at kl@euroheat.org.

Euroheat & Power Updates

Euroheat & Power joins DHC international collaboration initiative

On 27 August 2015, Euroheat & Power, represented by Managing Director Paul Voss, signed the Memorandum of Understanding for enhancing international collaboration in the field of District Heating and Cooling, together with representatives from the International District Energy Association (IDEA), the Korea District Heating & Cooling Association, the China District Heating Association and the Mongolian Ministry of Energy. The initiative is a formal recognition of the need for and commitment to reinforced cooperation and information exchange at global level. [Full press release.](#)

For more information contact Dana Popp at dp@euroheat.org.

About Us

Euroheat & Power is the international association representing the District Heating and Cooling (DHC) and Combined Heat and Power (CHP) sector in Europe and beyond.

Publications

DISTRICT HEATING AND COOLING COUNTRY BY COUNTRY 2015

SURVEY IS AVAILABLE!

The 2015 survey reflects on the situation, possibilities and trends of the CHP/DHC sector at national and European level and provides extensive updated information on sector developments in national markets. Price: € 60.50 for EHP Member (login first as member) or € 181.50 for non-members

Hotels near EHP

As of January 2015, Euroheat & Power has a corporate agreement with the **Starwood Hotel Brussels**. The two hotels participating in the agreement are: [Aloft Brussels Schuman Hotel](#) (Place Jean Rey, Brussels 1040 - rates not exceeding 185€) and the [Four Points Brussels Hotel](#) (Rue Paul Spaak 15, Brussels, 1000 - rates not exceeding 150€).

As part of her study programme, she started her internship with Euroheat & Power on 2 September and will be part of the team till the end of December.

She has a Bachelor in International Law as well as work experience in public administration (Ukrainian parliament and German local administration). During her internship, she will help the DHC+ Technology Platform team on the DHC+ Brokerage event, education and training activities, support project management on the STRATEGO project as well as conduct research, monitoring and advocacy.

Tetiana can be contacted at intern@euroheat.org.

DHC+ Updates

DHC+ Student Awards at the 4DH Conference

On 25-26 August 2015, the 4DH Research Centre hosted the [International Conference on Smart Energy Systems and 4th Generation District Heating](#) in Copenhagen, Denmark. This year's conference has gathered 190 researchers and experts from the energy and district heating industry. It has been a wonderful opportunity for the [winners of the 3rd International DHC+ Student Awards](#) to present their findings. Susana Paardekooper from Aalborg University (Denmark), Wiet Mazairac from Eindhoven University of Technology (the Netherlands) and Spyridon Provatas from Blekinge Institute of Technology (Sweden), were honored to make their presentations at the dedicated sessions and receive the Awards from Bertrand Guillemot, the DHC+ Chairman, during the special ceremony at the Closing Plenary Session.

The 4th edition of the Student Awards will be launched soon. Stay tuned!

For more information contact Aksana Krasatsenka at ak@euroheat.org.

DHC+ Summer School: DHC meets ICT in Torino

After two successful editions in Berlin (2013) and Helsinki (2014), the DHC+ Summer School went south. The 3rd International DHC+ Summer School took place from 30 September to 5 September in Italy and was kindly hosted by Politecnico di Torino and ISMB – Istituto Superiore Mario Boella. For the first time, the programme featured the interaction between DHC and ICT technologies, Horizon 2020 funding rules, as well as design and modelling of DH networks. Participants have very much appreciated the involvement of the local energy companies – IREN and EGEA – who not only opened their doors for the technical visits, but also provided lectures and practical demonstration of ICT tools. We thank our Italian partners for the excellent organisation and look forward to start planning the next DHC+ Summer School!

For more information contact Aksana Krasatsenka at ak@euroheat.org.

DHC+ Brokerage Event: Registration deadline 1 October!

Join us at the DHC+ brokerage event to receive first hand information about the Horizon 2020 heating and cooling priorities for 2016-2017, to learn about other funding opportunities and to find partners for a successful project proposal.

Hurry up and [register](#) before 1 October 2015! Starting from this date no registration, cancellation or modification will be accepted.

[Book a room](#) at the Sheraton Brussels Hotel, the brokerage event location, at the best available rate.

How to book:

1. Option: If you wish to book a room in any of these two hotels, please contact reservations.brussels@starwoodhotels.com (with office@euroheat.org in CC) or call +32 2 224 3274 and mention the SET# 457734 - EUROHEAT POWER, the name of the hotel you would like to stay at as well as your arrival date & time and departure date.

2. Option: Book Online

a. ALOFT BRUSSELS SCHUMAN - www.aloftbrussels.com --> you enter the dates + tick Lowest Standard Rate + tick STE/Corporate Account # number and indicate 457734.

b. Four Points Hotel Brussels - www.fourpoints.com/brussels --> you enter the dates + tick Lowest Standard Rate + tick STE/Corporate Account # number and indicate 457734.

As of April 2015, Euroheat & Power also has an agreement with **Hilton Brussels Grand Place** (Carrefour de l'Europe 3, 1000 Brussels, Belgium – EHP rates not exceeding 170€ incl Breakfast, Internet, VAT + 7.58€ City Tax). If you wish to book a room in this hotel, please contact reservations.brusselsgrandplace@hilton.com (with office@euroheat.org in CC) or call +32 2 548 42 11 and mention the Corporate account#: D113040910 as well as your arrival date & time and departure date or book through this link: www.brusselsgrandplace.hilton.com and insert the Corporate account#: D113040910

We look forward to seeing you on 7 October in Brussels!

For more information contact Aksana Krasatsenka at ak@euroheat.org.

Purmerend: fast renovation of 4000 house connections

As one of the largest district heating projects in the Netherlands, Purmerend showed over the last five years how a corroded and under-capacitated network, suffering from heavy leakages and energy losses, could be re-engineered in a smart solution that is sustainable, reliable and highly valued by its users. Stadsverwarming Purmerend (SVP) connects today more than 4000 homes with innovative SlimNet piping and provides more than 80% renewable heat (sustainable woodchips).

Further information is available [here](#).
